Check the content

The set contains: ANTYKUNA device, 4 pcs. of zip tie, 2 pcs. of nuts, 2 pcs. of washers, 2 screws,

Mounting instructions

Check if the set is complete.

Find the place where you would like to mount ANTYKUNA device (at the distance of the cable's length from the device to the battery's positive terminal or the power source

Mount the device at an angle of 35-45° at the place of your choice using zip ties and/or mounting screws to the car's body or other immobile parts in the engine's compartment.

Connect ANTYKUNA device's cables to the battery terminals remembering that the black protective pipe must not touch hot parts of the engine.

Using the nut and the washer, connect RED "+" cable and in the same way connect BLUE cable "-". Secure the device by fixing zip tie to the device mounting points and immobile parts near Antykuna device.

After nuts have been tightened up, the led on the device is on flashing in various colors and the emission of variable frequency of ultrasounds will start .

If the led is off and the sounds are not produced, check connections of cables to the battery.

Warranty conditions:

1. ANTYKUNA.PL P.H. MOTOR-SERVICE hereinafter called Seller hereby warrants:

good quality and unfailing operation of the device under the condition of mounting, storage and handling the device in compliance with the guidelines contained in the Instruction Manual.

2. Warranty is granted for the period of 24 months starting from the date of sale to the retail customer who was charged with the bill. In case of corporate / business customers who were invoiced, the warranty shall last 12 months. Time spent on the repair work shall be added to the warranty period.

3. Valid warranty certificate must be submitted by the User together with the device for the purpose of the warranty repair. Warranty certificate as well as the device must not be modified or tampered with in any way.

4. When no faults or defects are found in the product submitted for warranty repair, User shall be charged with costs related to transport of merchandise and the diagnostic tests performed by the serviceman.

5. Product replacement or free of charge repair is under the warranty coverage provided that a defect caused by the Seller or Manufacturer has been detected.

6. In addition to AC/DC ADAPTER 230V 100mA, the following failures shall be excluded from the warranty coverage: defects caused by a lightning stroke, power line overvoltage, mechanical shock, fire, electric discharge, flood or any other occurrences beyond the control of the Seller and the Manufacturer.

7. In order to perform the warranty repair, User must bring the device to the service station at his own expense. After the repair is completed, the device shall be returned to the customer at the Seller's expense.

8. Warranty repair shall be completed at the earliest possible time necessary for accomplishing the repair work. The customer shall be informed by the Seller or Manufacturer within 14 working days, to the exclusion of special cases, when a default is not of permanent nature and a longer diagnostics is required.

9. User's right to warranty repairs shall be annulled when a product becomes faulty due to interference with the product's electronic circuit by an unauthorized service station.

10. User's right to warranty repairs shall be annulled when a product is unplugged from the power source without the Manufacturer's instructions or knowledge or when an environment in which the product is used fails to meet requirements set forth in the Instruction Manual.

11. User's right to the warranty complaint shall be annulled, when the product is installed contrary to the Manufacturer's mounting instructions, when product's construction is altered or modified or when the Antykuna repeller's performance characteristic is changed.

12. Manufacturer shall not assume any liability for hidden defects, in particular defects caused by the product's use as well as incidents occurring due to the product's operation. Manufacturer shall also not be held liable for damages caused by extreme weather conditions such as thunderstorm, hail, blizzards, heavy rainfalls or snow fall.

13. When submitting the product for the warranty repair, User must provide his own contact details, indicate address to which the product should be returned, attach a brief description of a default, a copy of the proof of purchase, a photo documentation, manner of installation and the place where the product was mounted before removal, to the following e-mail address: antykuna1@wp.pl

14. Warranty does not provide the title for the User's claims regarding the cost refund and losses suffered in connection with the product's damage.

15. Seller's liability is limited to the amount equal to the price of the defective product.

16. the provisions of the present warranty shall not affect the statutory consumer's rights in accordance with the legal regulations currently in force or the consumer's rights towards the Seller under the purchase sale agreement.

17. The purchaser accepts the conditions contained in the warranty and confirms his acceptance by signing the warranty certificate. Warranty certificate without the purchaser's signature shall be deemed void.
