DECLARATION

I hereby declare that the depressing compound for the MRTIP DIESELSKYDD fuel oil, at the recommended dose of 1L for 1000 liters of fuel oil, does not change quality parameters of the fuel oil, described in PN-EN 590:2013-12E and required in Directive of Minister of Economy of May 10, 2013 regarding the announcement of the consolidated text of the ordinance of Minister of Economy concerning the quality requirements for liquid fuels.

Adding MRTIP DIESELSKYDD compound to the fuel oil, only CFBT (cold filter blocking temperature) is subject of the change. MRTIP DIESELSKYDD compound is the fuel oil conditioner.

MRTIP DIESELSKYDD is completely combusted without any ashes during the diesel engine operation and does not have the negative influence on the engine operation, catalytic systems in the exhaust system and other elements coming in contact with the fuel and fuel combustion products.
