THE REVOLUTION IN CABIN AIR FILTRATION

UFI FILTERS ARGENTIUM®

NEW FILTRATION MEDIA

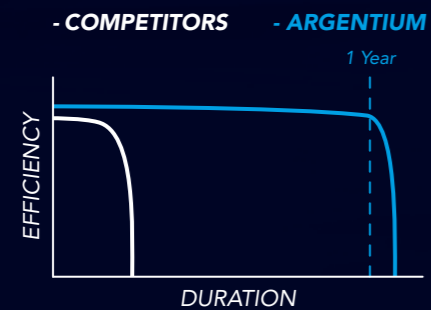

Argentium is the new filtering media created by UFI Filters, thanks to its long experience in the research and development of new materials. The revolutionary filtering media is non-woven and incorporates silver particles, with strong antimicrobial properties. Argentium keeps its antimicrobial properties during the entire life cycle, unlike products currently available in the market.

Argentium offers a clear improvement in the air quality inside the vehicle thanks to a specific combination with activated carbons. This combination guarantees a high filtration efficiency as it absorbs allergens, harmful gases and unpleasant odors and neutralizes bacteria and mould fungi.

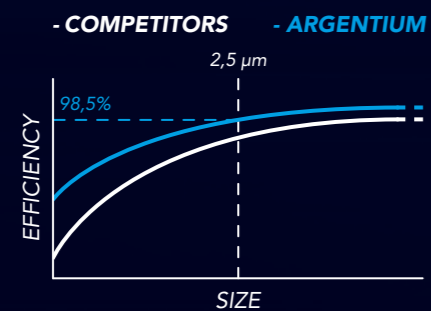

ONE YEAR PROTECTION

Argentium's silver based antimicrobial properties are embedded in the fibres. This makes it unique as the antibacterial efficiency is prolonged in time.

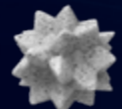

BLOCKS PM₁₀ - PM_{2,5}

Argentium guarantees a filtration efficiency >98,5% for particles with size 2,5µm and >99,9% for particles with size 10µm.

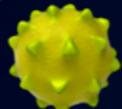

MICROBES

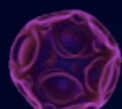

PM₁₀

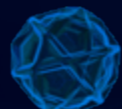

PM_{2,5}

ALLERGENS

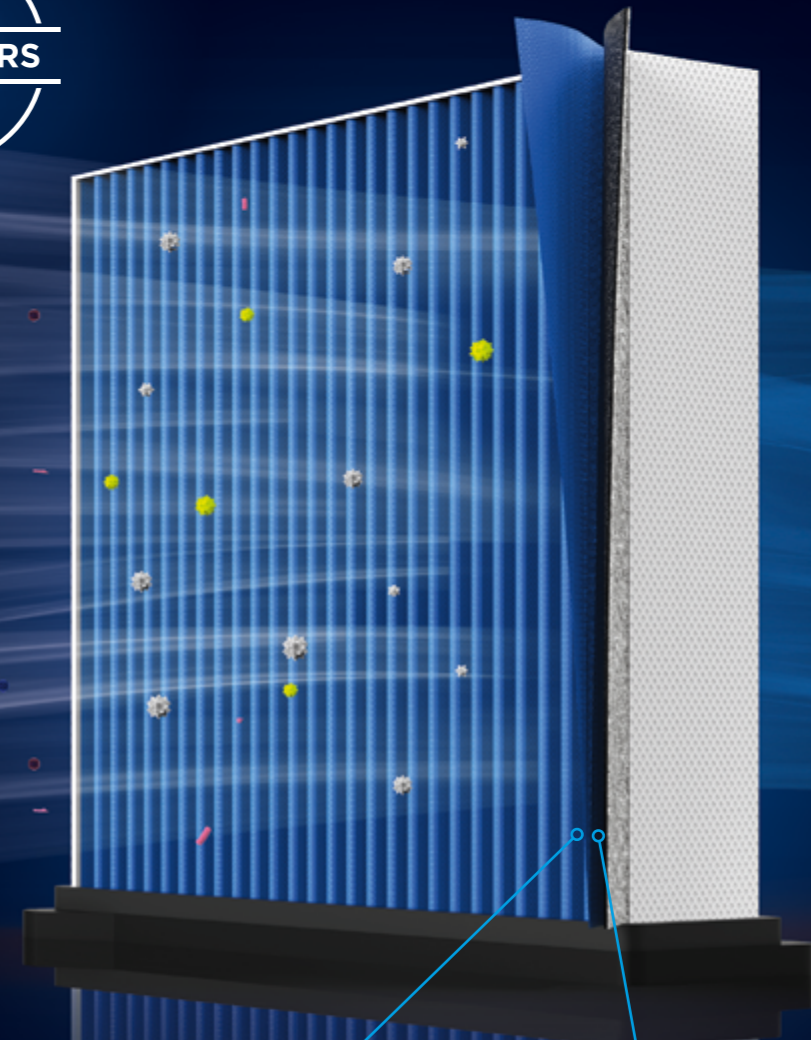

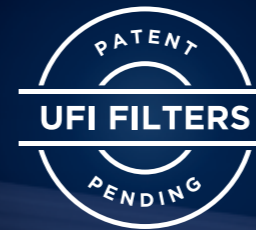

SO₂

NO_x

ODOURS

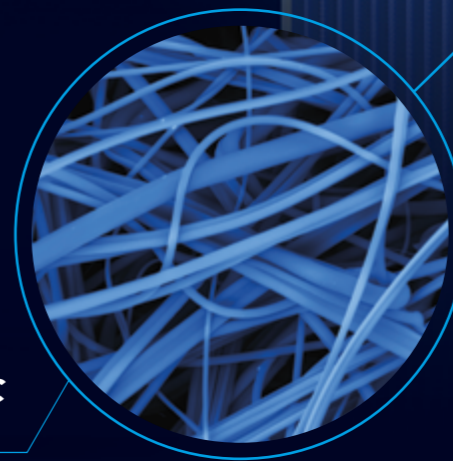

ANTIMICROBIC FUNCTION

Argentium inhibits microbial growth by up to 99% thanks to Biomaster silver biocide, tested to ISO 22196:2011.

DEJECTS NO_x - SO₂

The specific combination with activated carbons blocks unpleasant odours and harmful gasses such as sulphur dioxide and nitrogen oxide.

UFI FILTERS INNOVATION

THE NEW GENERATION OF CABIN FILTER

UFI Filters cares about what you breathe every day inside your vehicle. For this reason, it has employed its researchers for the development of **Argentium**, disruptive technological innovation that marks the beginning of a new generation of UFI cabin air filters.

UFI Filters advises to replace the cabin air filter at least once a year. Missing the replacement interval leads to a poor air quality inside the vehicle. Dust accumulation and pollutants can put at risk the health and general well-being of the driver and passengers, favouring allergies, throat irritation, sneezes as well as tiredness and low concentration after long driving periods.
