

The Euroguide is a document to help identify the right products needed for TPMS maintenance. There are three different covera ge lists : a "Make\Model\Year Look up", a "Sensor Look Up" and a "Service Kits Look Up".

Make\Model\Year Look up: This list helps identify the right sensors needed using a Make/Model/Year classification.

1/ Choose the car manufacturer and the model of the car in the column " Make Model".

2/ Identify the code of the car in the second column "Model code".

3/ The columns "Start of Application" and " End of Application" show if the car has been fitted with a TPMS direct system by the car manufacturer during this period of time.

4/ If the car falls within this time range, all the necessary information in the following columns can be found (same line, f rom left to the right)

5/ **Schrader Part Number:** This is the new After Market reference to order the matching sensor for the car.

6/ **OE Sensor reference:** This is car manufacturer's part number for the sensor.

Notice: VDO and HUF:are protected brands of the companies VDO and HUF. Schrader is a distributor of VDO and HUF products. Product design, description und brands are properties of HUF and VDO.

TPMS Euroshop makes every effort to ensure that the information contained in this list are correct, but cannot guarantee 100% accuracy of the information. Customers should be aware that they buy and use any products on this website at their own risk.

This list will be regularly updated.

Sensors Look Up: This list identifies which cars can be fitted with a particular Schrader referenced part number.

- 1/ Identify the Schrader Code of the sensor (After Market reference) in the first column "**Schrader Part Number**"
- 2/ In the same column identify which car manufacturer and car model the sensor is fitted on.
- When the sensor reference is matching the right car model, all the necessary information concerning the car and the sensor are in the following columns (same line, from left to the right).
- 3/ **Car Model Code** is the Identification code of the vehicle.
- 4/ "**Start of Application**" and "**End of Application**" show if the car has been fitted with a TPMS direct system by the car manufacturer during this period of time.
- 5/**OE Sensor reference:** This is car manufacturer's part number for the sensor.
- 6/**Sensor Description:** Description of the After Market reference.
- 7/ **Direct TPMS car park in Market:** number of vehicles introduced in the reference market with direct TPMS systems using the specific sensor indicated in the OE sensor reference column.

Euroguide -Service Kits Look Up

September 2019

Service Kits Look Up: The application sensor list applied to a service kit is a list detailing which sensors can be serviced with that particular service kit. The number besides the code represents the quantity included in package (for example 5001-10 means a package containing 10 Service kits)

- 1/ The first column "**Service Kits Part Nr./ Schrader Part Number (NEW)** " lists each service kit and identifies the sensors matching with the selected service kit (red references)
- 2/ The second column titled "**Service Kit Description**" shows the description of the selected service kit.
- 3/ The remaining column details the After Market "**Sensor Description**" of the sensor that can be serviced with the selected service kit.
