CAR CAMERA MODECOM REC MC-CC14 FHD TS

Built-in microphone

The camera is equipped with sensitive microphone enabling, e.g. recording instructional videos from your trip or simply comment on what's happening.

USB slot charging

Built-in microUSB slot for charging. 3-metres-long USB cable enclosed to the set enables convenient use even in big cars. Thanks to the USB slot, you can copy the recorded material to your computer.

Rotary car holder

The camera can be attached to the windscreen with the use of convenient silicone pad. Thanks to rotary mounting, you can set the right angle in order to obtain optimum visibility.

MicroSD card reader

The camera is equipped with microSD card reader supporting cards up to 32 GB.

Touch-screen

Car camera MC-CC14 has colour touch-screen. Thanks to the touch-screen, you can easily change camera settings.

Wide-angle lens 120°

Camera MODECOM MC-CC14 provides you with high-quality materials. The camera is equipped with wide-angle (120°) lens recording everything what's happening in front of you.

Built-in G-sensor and motion sensor

Built-in G-sensor detects sudden change of car position. Consequently, you can be sure that in case of an accident, the camera won't stop recording and the recorded material will be secured from deleting.

Full HD lens

The lens employed in the camera records very sharp videos in full HD resolution.

Touch-screen with 2.8" diagonal

Car camera MODECOM REC MC-CC14 has touch-screen with 2.8" diagonal. You can watch the video you recorded and establish the desired setting very easily. Intuitive software enables quick change of settings and activating given functions.
