# [COMFORTABLE USAGE]

**Xblitz Ghost** was equipped with enormous, functional buttons located on the both sides of the camera, which makes the camera maintenance easy, simple, intuitive and safe. One-hand maintenance is no longer a problem!

# [G-SENSOR]

G-sensor function protects essential files in the moment of collision or sudden braking. Camera automatically protects video files from being overwritten.

## [PARKING MODE]

Parking mode is a function that will ensure safety for your vehicle. The device detects a motion in the field of view of the camera and starts to record. You don't need to stay in the car to make the car camera watching for your vehicle.

# [LOOP RECORDING]

The storage medium of the **Xblitz Ghost** camera is a microSD memory card with a capacity of up to 32GB. This is a memory interval, allowing for a single record of a long route. However, you do not have to worry for lack of space and continuous deleting of archival files. The recorder records the image in a continuous mode (recording in a loop) it means nothing more than overwriting older files - with newer ones.

# [TECHNICAL DATA]
