

TS-G1020F

10cm 2-Way Coaxial Speakers (210W)

For better-sounding drives.

Discover the renewed G-series

The improved G-series speaker range is specifically developed for premium and powerful audio, with excellent value for money. Their rigid design has been optimised with multi-bolt patterns, making it very easy to install any G-series speaker in your car. Thanks to their **increased power handling** and **high sensitivity performance**, these speakers reproduce deep, impactful bass and natural highs – even at high volumes.

TS-G1020F

Upgrade your in-car sound in a smart and affordable way with the TS-G1020F. This **10cm 2-way coaxial speaker** delivers up to 30 Watts of nominal power and has a maximum power output of 210 Watts. It also features:
