

TS-WX010A

Ultra Compact Space Saving Active Subwoofer with built-in Class-D Amplifier featuring BASS SOUND CREATOR concept for impactful and quality bass. Easy to install at foot space thanks to its trapezium design. (160 W)

Small and powerful!

Pioneer's TS-WX010A is the smallest Active Subwoofer in its Active Subwoofer category. Designed to be installed in the passenger foot space area, TS-WX010A uses a Symbolic Trapezium design that can be easily installed vertically or horizontally.

TS-WX010A gives a new sound experience, thanks to Pioneer's BASS SOUND CREATOR feature that offers impactful and high quality bass sound, a built-in CLASS-D amplifier and a down firing subwoofer for effective reproduction of low frequencies, so you can really feel the bass.

Furthermore, by installing in the passenger foot space area, it can improve the front sound imaging, by creating a natural sound connection with the front speakers, allowing you to experience a new sound experience.
