

TS-WX300A

30cm Powered Active Subwoofer with Class-D built-In Amplifier (1300 W) Single Voice Coil.

Powerful Bass, that's easy to install.

Upgrade your vehicles sound system with this **easy to install Pioneer Active Subwoofer package** for strong powerful bass. (Amplifier is built-in and cables are included).

The TS-WX300A features a strong and lightweight IMPP™ (Injection-Moulded Polypropylene) Composite speaker cone, that provides solid and rhythmical bass. It also features a **Class-D amplifier that is built into the side of the enclosure**, amplifying the bass to high volumes, but also making it easy to install as it can save space and installation time. The Class-D amplifier also has various settings ensuring the user can get the type of bass they want, depending on their own taste in music.

TS-WX300A is a 30 cm subwoofer in a ported, bass reflex design enclosure, delivering 1300 W Maximum power and 350 W Nominal Power.
