

Advantages of NAVITEL R10

One look at it and you know – this tiny and powerful DVR is like no other. Chances are NAVITEL R10 will mesmerize you with its **futuristic design** so let's just dive into the discussion of its secret talents.

NAVITEL R10 consists of a **3M adhesive mount** that attaches firmly to the windscreen of your car and a camera connected to the mount with a **magnetic bracket**. This allows for easy **360° rotation** of the camera. With NAVITEL R10, you can record critical footage of events happening in front of you or inside of your car, capture passenger's seat as well as driver's side door. Use it to protect yourself against acts of dishonesty or corruption.

The lens of NAVITEL R10 dash cam is composed of **6-layer glass** to ensure high quality video recording. The DVR records **FullHD** footage with enhanced clarity at 30 fps frame rate. With a wide viewing angle of **165°**, impressive in such a compact device, NAVITEL R10 provides an optimal view and allows to take in a more detailed picture. Video is recorded in a continuous loop. The built-in **G-sensor** is activated in case of collision or an abrupt maneuver. The camera then saves the footage recorded during the accident and protects it for future reference making sure it is not written over.

NAVITEL R10 **Wi-Fi App** allows to connect the dash cam to your smartphone, instantly NAVITEL R10 is equipped with a **built-in GPS antenna to determine precise geo location** of the car in the moment of recording. The ergonomic device features a 1.2-inch color display with 16:9 aspect ratio and a sensitive microphone. It supports microSD cards up to **64 GB**.

BONUS. All users receive a gift voucher with a 12-month licence key that allows to install Navitel Navigator application with maps of 43 European countries, Russia, Belarus, Kazakhstan and Ukraine on one mobile device.
