

Advantages of NAVITEL R250 DUAL

High quality footage at night - NAVITEL R250 DUAL is a dashboard camera with a modern GC2053 sensor (night vision) and glass optics, which enables recording of a detailed image in low light or at night.

Recording resolution FULL HD 1920x1080/30fps and the best compression technology H.264 ensure the highest quality of recording and playback with the small file size.

Built-in G-Sensor detects sudden acceleration, braking or any other emergency situations. Critical footage is saved automatically and stored safely on the memory card.

Advanced Parking Mode - the device detects vibration of the camera and starts recording while the car is parked (provided there is a constant power supply to the device).

With the help of rear camera you can get a high-resolution image behind your car for safe parking or recording while driving.

Suction cup mount included in the package allows to easily install the camera in the car.

Bonus - Navitel Navigator license key for maps of 47 countries for 12 months.
