Advantages of NAVITEL R6

The best video resolution – Quad HD (2560x1440 / 30 fps), Full HD (1920x1080 / 60 fps), HD (1280x720 / 120 fps).

Thanks to the OmniVision sensor device is recording footage in the highest quality even in bad lighting conditions.

2-inch screen with resolution 960x240 can be turned off during the ride while the device is still working.

2 batteries – inside the device and in the holder – allow for continuous power supply and easy mount.

The optical system uses a wide-angle 170° lens with a 4-layer glass lens, which allows recording everything that happens in front of you in panoramic mode.

MicroSD card reader supports cards up to 256 GB and allows for long recording films in high definition.

The device has a very sensitive microphone for audio recording in the highest quality.

The built-in G-sensor is activated in case of collision or an abrupt maneuver – it saves the footage and protects it for future reference making sure it is not written over.

Inside the package there is a reliable 3M windscreen holder which provides maximum grip even during active driving.
