## Seal kit, injection nozzle

# Audi | Ford | Seat | Škoda Volkswagen

 **900.650**

Fitting instructions:

Always replace the adjusting screw as well when exchanging the ball pin. The Elring seal kit, injection nozzle  900.650 contains both components for this purpose. In addition to resulting in far greater wear, the use of an old and worn adjusting screw together with a new ball pin vastly increases the risk of ball pin fracture. Please avoid fitting an old adjusting screw in combination with a new ball pin.
