

MATERIAL SPECIFICATION

TEXTAR

Textar G203

Main Vehicle Application

DAF
Leyland/DAF

Main Brake Manufacturer/Type

S-Cam brake

Friction Material Release

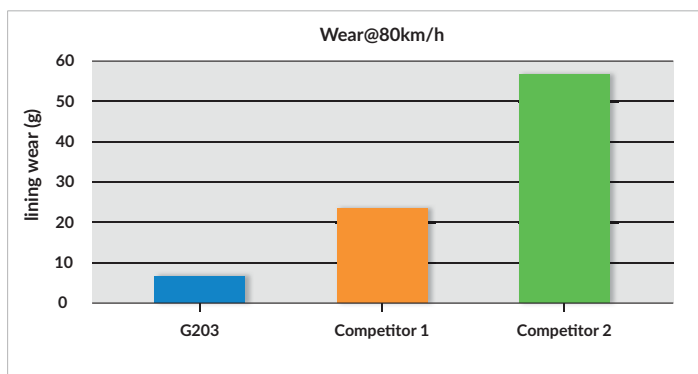

OE lining material

Features and benefits

G203 is a fully moulded asbestos-free brake lining material of medium friction. This material has good brake qualities - low thermal damage, high resistance to fade and wear.

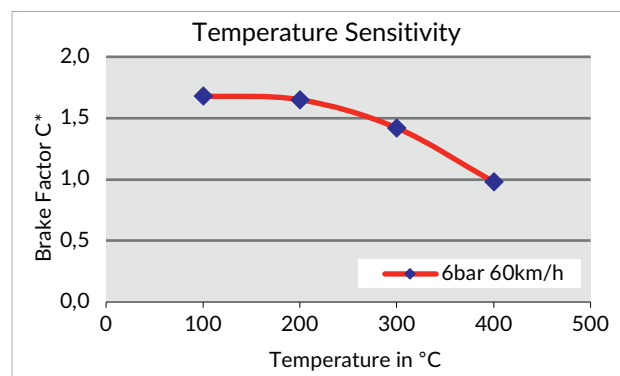

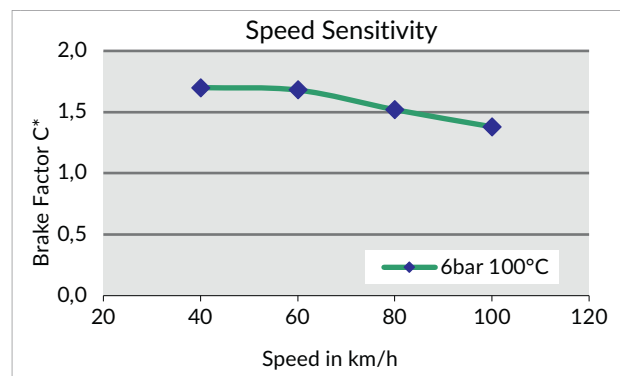

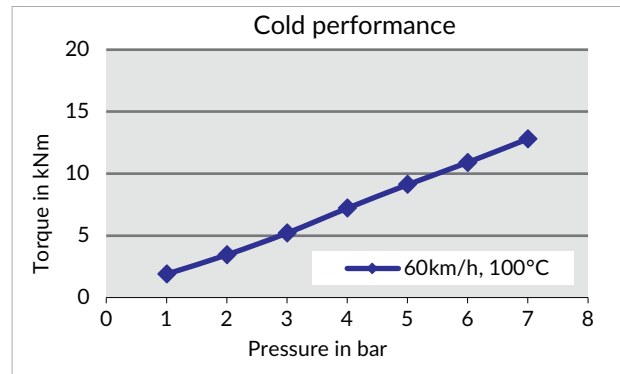

General Description

Textar G203 is an OE lining developed specifically for S-Cam brakes in DAF trucks. This premium material was developed and tested according OE test procedures and specifications. As a lining material, the G203 has excellent ability to brake over a range of speeds and can perform even at sustained high temperatures. The material exhibits fantastic pad wear which is far ahead of various competitors in the market and has a good compatibility to the brake drums.

Friction Performance/Output

(tested on Mercedes/MAN S-Cam brake, 410x160 mm linings)
